

Introductions

Dev Team Items

- For Mike:
 - Send team website over email
 - What is the best way to communicate with you?
- Database Design
 - Memberships
 - Users can be connected to several groups
 - Go over how users and groups are organized
 - Inventory
 - Part is a generic part that can be added as an “InventoryPart”
 - InventoryPart has reference to an inventory
 - What attributes do we want for Part?
- UI (keyframes)
 - What should be displayed on home page?
 - Show posts under user’s account page?
 - Can a user message another without a listing?
 - We found open source forum libraries, are we good to research, compare & contrast etc.?
 - iPhone adaptability?
- Midterm evaluations are next week, takes about 40 minutes

Coach Items

Notes

- <https://ppcmem.org/>

Database

- Membership: everyone has their own account to keep their own inventory and the group inv is to remove the need for redundancies
 - Modify ht password files each time there is a change in the group, cant have it more than place to minimize security risks
- Is there a way for the owner of the non-profit to monitor/own the employees actions (logins, log offs, changes they make, etc)
- Org owns user account
 - On signup they must be associated with an organization
- Inventory
 - Parts: Tires and wheels are the most common part
 - Perishable: things that need to be replaced frequently
 - Accessories: armrest, headrest, etc
 - NEEDED ATTRIBUTES: Brand, model, year, manufacturer, serial/part number (optional when creating an entry of a part)
 - If a URL is stored in part is there a way to see if the URL is still valid
 - Ping the url
- If account is marked inactive after ‘90’ days auto send an email to make sure the user/ organization still exists

UI

- First thing to see when login
 - Either lists their parts or look for parts
 - Show own inventory
 - Inventory search db
 - Quick to forums
- Geographic search functionality to bias those closest
 - Mostly using Zipcode
 - Show all matches but sorts on distance
- User account page
 - Show all users' activities (posting, buying, forums, etc)
- Can users PM other users without going through a listing?
 - No, they want to enforce connection between users
 - Friends list? Close contact list?
 - Referral, needs a backend auth, ONLY REFERRED USERS
 - Referring users should submit: *email* (contact info need to add the user), a short reason why
 - Questionnaire
 - Track who refers who to keep track of accountability
 - Users without an account can request access
- Open source forums
 - 
- phone/iPad friendly
 - Yes
