

Intro

Dev Team Items

- Go over technical tools
- Present UML
- Project Milestones

Questions

- What kind of user roles do we want?
 - For the sake of editing an inventory do we want an Inventory Owner and a Worker?
- Should a listing have a public/private feature?

MIF Items

Coach Items

Notes

- No pricing
 - Solely trading
 - Listing doesn't need the Price
- Legality
 - As long as not selling we are all good to go
- Location
 - Add website URL since it will be a nonprofit
- Part
 - A cataloging system can be installed
- User
 - Ranking
 - Based on user satisfaction, reviews
 - Consumer and vendor rating system
 - Karma system
 - User groups is a go
 - A single user has all the access, while someone might have a restricted access
- Inventory
- Order
 - Will be queued in order based on first come first serve
- Conversation
- Listing
 - Can mark a listing as public or private
- Tom is going to be the main person or Mike, not Devin
- Tools
 - When youre all done will a user manual be given
 - Mike to be the first tester
- Milestones
- Importance on accessibility
 - Color schemas, fonts, etc
- Start work with datamodel
 - Does the DB collect metadata on entries?
 - Bring information about the DB to meeting with malachowsky

Ideas

- For a listing, there is a reference to a vendor
 - Is it possible to display user data (almost like a profile that contains other details)
 - website, phone number, other contact details?
